SPECIMEN — fictional data

Supplier carbon data sheet

EXEMPLE / EXAMPLE SARL · FICTIF / FICTIONAL
Period: 2025-01-01 / 2025-12-31 · FR

Sites, entities and vehicles under your operational control

Bureau / Office - France continentale

Scope 1	Scope 2 location-based	Energy / Energie
0 tCO2e	0.394 tCO2e	10 MWh

Calculated scopes 1 + 2: 0.394 tCO2e
Separate biogenic CO2 (outside total): 0 tCO2

Declared sources covered, without external validation

Automatically calculated from your declarations, without independent audit or certification. Confirm acceptance with the recipient. This document is not a statutory GHG inventory or a complete VSME report.

ADEME V23.6 factors are historical: electricity 2023, gas 2022, fuels updated in 2021 with stated validity through 2020. Use for another year is an explicit approximation. Factors must be refreshed before commercial launch.

Declarant name and role

Exclusions and reasons: —

Calculation details

Purchased electricity: 10,000 kWh × 0.0394 = 394 kgCO2e
Data origin: Invoice / meter reading · SPECIMEN
Energy consumed (NCV for fuels): 10 MWh
ADEME Base Carbone V23.6 · 43273 · Combustion à la centrale · 2023 · Année 2023

Methodology

Quantity × factor = kgCO2e; divide by 1,000 for tonnes. Scope 1 uses the ADEME combustion component. Location-based scope 2 uses the power-station combustion component of the mainland France consumption grid mix. Upstream and transmission/distribution losses are excluded, as is scope 3. Divide kWh by 1,000 for MWh; convert natural gas GCV energy to NCV by multiplying by 0.9. Fuel NCV energy is declared separately from supporting records, without a generic litres/kWh conversion. Biogenic CO2 is shown separately. No monetary factor is used.

Limitations

This sheet supports data exchanges with customers. It does not cover all VSME indicators or BEGES, CSRD or ESRS obligations. References describe methodology and context; they do not endorse Certif-Scope or require purchasing this service.
Relevant or unknown sources without a validated factor (refrigerants, purchased heat, other fuels, processes, self-generation) prevent purchase. A partial total does not mean zero emissions for those sources.

Verify a file

The signature checks JSON data integrity and technical origin, not the truth of declarations or certification. It is not a PAdES signature of the PDF.

Privacy

Drafts and reports are retained for delivery for 30 days, then removed by the purge job. Supporting documents are not uploaded. Stripe processes payment and invoicing data; accounting retention is separate. Contact contact@certif-scope.com to request access, correction or deletion. You may complain to the CNIL.
